October 13, 2008

Dear Friends,

Fall is upon us already and winter will be approaching soon! With the fall weather, comes a change in our skincare routines. Cold weather and the harsh elements usually mean we need to spend some extra time pampering our skin. We now carry a full range of skin care products and services designed to enhance and maintain the skins natural balance. What better time to start a skin refreshing routine like our Fraxel laser or OBAGI system to erase the damage of the summer sun.

Recently we have had two new additions to the office of Colen MD Plastic Surgery Suite. We are pleased to announce Kari Colen, MD who has joined our team. Kari completed Plastic Surgery training at the prestigious New York University Medical Center. In addition to surgical procedures, she will also be able to provide the Fraxel CO2 re:pair Laser to eliminate fine lines and wrinkles for those who are not ready for surgery.

In addition, we also welcome Anita Barba, RN, NP. Anita specializes in injectables such as Botox & Juvederm. She is also in charge of our laser and skin treatment program. After graduating from Pace University, she also completed extensive training and certifications in facial rejuvenation that includes Fraxel, YAG and Alexandrite lasers (veins, age spots, hair and telangiectasia removal). Anita will work with you to develop a custom skin care regimen that fits your skin care needs.

To celebrate the change of season we are offering you a complementary skin evaluation with Anita with a 20% courtesy toward you next Botox, Juvederm or the Laser treatment of your choice until December 31, 2008. To schedule an appointment, please call us at 212-988-8900 and mention this newsletter. For our established customers, we miss you and look forward to seeing you soon!

Health and happiness,

Colen MD Plastic Surgery Suite
